

## WHO WE ARE

Trade Consulting Services (TCS) helps clients understand import-export regulations. We assist your international trade business by designing and implementing effective compliance solutions. Compliance programs can be mitigating factors to alleviate fines and penalties. At TCS, we're experienced — with more than 14 years guiding companies in the defense, telecommunications and medical industries.

## WHAT WE DO

Export regulations can be overwhelmingly complex and confusing. Trade Consulting Services provides straightforward solutions.

How?

- By building sound compliance programs to help clients meet obligations.
- Reviewing your company's policies and procedures.
- Implementing additional controls to safeguard products and technologies.
- Drafting licenses and agreements for products under jurisdiction of the departments of Commerce and State.

## WHY IT MATTERS

It's critical to have the right policies and procedures in place to avoid costly mistakes. When companies don't exercise due diligence, compliance failures risk:

SEVERE FINES

SEIZURE OF GOODS

DEBARMENT

PRISON

PENALTIES

## OUR SERVICES

Compliance program implementation

Commodity jurisdiction

Export classification (USML, ECCN, HTSUS, and Schedule B)

Policy and procedure creation

Voluntary disclosure

Drafting licenses and agreements

Compliance training

Need help improving and evaluating your company's compliance? TCS's personnel provide the expertise you need with International Traffic in Arms Regulations, Export Administration Regulations and U.S. Customs regulations.
